

### Features of Bulk Price Update for Magento

- Ability to update prices for multiple products selected via Catalog -> Products in Admin Panel
- The "Price" or "Special Price" can be increased or decreased by percentage or certain amount.
- The new price decimals can be rounded.

### Usage of Bulk Price Update for Magento

- In Admin Panel open Catalog -> Products
- With the checkboxes in the very left column select the products you would like to update or Select All
- In the top left of the table, there is an "Actions" selector, select "Update attributes" there
- On the left side select "Prices" tab. Then specify how the prices should be changed and "Save"
- That's it. Thanks.
